RETIREMENT PLANNING APPROACHES

01 | SAFETY-FIRST STRATEGY

Safety-first sounds secure, but it's actually the riskiest approach in today's economy. This outdated method relies heavily on employer plans and basic savings that fail to keep pace with inflation. Most people following this path discover too late that "safe" investments have left them financially vulnerable in retirement.

Working with this traditional approach means accepting whatever your employer offers and hoping it's enough. You'll typically max out your 401(k), open a basic IRA, and add some CDs or savings accounts. The problem is you're putting all your trust in systems designed decades ago for a different economic reality.

Inflation reduces purchasing power by 50% every 23 years at 3%.

Your \$100,000 today buys what \$50,000 will in two decades.

02 | MODERN COMPREHENSIVE STRATEGY

The comprehensive strategy recognizes that true security comes from diversification across protection, savings, and growth. This approach adapts to changing conditions throughout your life.

Implementing this strategy starts with analyzing your current situation and future goals. You'll work with professionals who coordinate protection, optimize taxes, and create growth opportunities traditional planners miss.
